

# Knowledge Futures: AI, Technology, and the New Business Paradigm

## CALL FOR ABSTRACTS – IFKAD 2025

Special Track n.: 20

Thematic Area: KM and AI Exploration and Adoption

### Artificial Jurisdiction and Legal Intelligence

#### Description

For a long time, digital justice has represented an epochal and significant change in the operation of the law and in legal practitioners. On closer inspection, in fact, the debate that followed the introduction of new artificial intelligence techniques in the regulatory and jurisdictional context has evoked significant food for thought in relation to various issues. Among these, classic themes for the philosophy of law and legal informatics showed particular importance: the (sometimes mobile) limits between legal reasoning and the discretion of the judiciary, the techniques of legal argumentation and the complexifications deriving from the multiplication of legal systems and the hierarchies that concern them, the relapses on teaching of law techniques. Again, the implications that derive from legal cultures (especially those deriving of legal realism and critical theories of law) that ask us to look at living law instead of positive law as the most capable of representing its evolution, movement, the encounter with the judge to be understood, above all, as human. Now, in the context of what must and can effectively be understood as a “revolution” that crosses not only economic and social relations, but also justice and legal culture, as well as living law and positive law, contributions both from legal and computer sciences are expected. Different approaches looking at theoretical reflection and the applicative dimension, as well as to the meetings and clashes between them in addressing the issue of artificial intelligence as a new tool available to justice, intend to open new paths of critical thinking, as long as they are aware of the need to imagine unprecedented scenarios in relationships, paradoxically, never so complex between “prediction” and “certainty” of law and rights.

#### Keywords

*AI, justice, ontology, semantic web, digitalization, NLP, compliance, legal informatics*

#### Organizers

Matteo Buffa, University of Milan, Italy

Stefano Montanelli, University of Milan, Italy

# Knowledge Futures: AI, Technology, and the New Business Paradigm

## Guidelines

Researchers wishing to contribute are invited to submit an **EXTENDED ABSTRACT** (ineditable format) of **min 500 and max 1000 words** not later than **31 JANUARY 2025**, using the submission procedure available on the website. The abstract should address theoretical background, research objective, methodology, and results in terms of expected contribution to Knowledge Management theory and practice. Authors are required to follow the guidelines for both extended abstracts as well as full papers available on IFKAD site: [www.ifkad.org](http://www.ifkad.org)

## Important dates

<b>31 January 2025</b>	<i>Extended Abstract submission deadline</i>
<b>24 February 2025</b>	<i>Acceptance notification to authors</i>
<b>20 April 2025</b>	<i>Early-Bird registration cut off</i>
<b>02 May 2025</b>	<i>Full paper submission deadline</i>
<b>31 May 2025</b>	<i>Registration deadline</i>
<b>2-4 July 2025</b>	<i>Conference sessions</i>

## For further information

For any information related to the event, please see the event website at [www.ifkad.org](http://www.ifkad.org) or contact the conference manager at [info@ifkad.org](mailto:info@ifkad.org)
